Yellow Transparent Apples (See Page 3)

HUNTSVILLE NURSERIES

Growers of
High Quality Nursery Stock
for Half a Century

1872-1922

Huntsville, Alabama

OF INTEREST TO OUR CUSTOMERS

In presenting this, our Annual Catalogue, we want to avail ourselves of this opportunity of thanking our old customers and friends for their past patronage, and wish to assure them that on any future business they may favor us with, we shall use every effort to give them the same service we have in the past.

For the benefit of those who are not acquainted with us, or with our methods of doing business, we wish to say that these nurseries were first started here at Huntsville in 1872, a half century ago, and during this half century our efforts have

been confined to growing and selling nursery stock of the very highest quality.

It may interest you to know that we have approximately fifteen hundred acres in our nursery plant. It requires a large force of skilled laborers who put in their entire time throughout the year to produce our trees and plants and pack them so they will reach our customers in the very best condition possible. Every branch of these nurseries is under the personal supervision of a member of the firm, aided by a staff of expert propagators, each being a specialist in his particular line. The nature of our organization is such that every order will receive the personal attention of these experts.

Brighten Up

Above is a photograph of a home showing how attractive one's home can be made by the proper planting of shrubs, shade trees and flowers. This picture will have served its purpose if it furnishes an idea for the brightening up of one home. Notice particularly the curved walk with the screen of Spirea Van Houttei, then the arrangement of the shade: a Silver Maple on the right and an American Ash on the left. The foundation planting is composed of Abelia Grandiflora, Japanese Privet and a border of Dwarf Spirea. In the foreground is an attractive bed of Hydrangeas as well as a small bed of everblooming roses.

Terms and Conditions—How to Send Your Order

ORDER BLANK enclosed in catalog should be used in every case. Please be careful to fill in all blank spaces with the information requested. Also be careful to write name of variety wanted, size and price, very plainly. This helps to avoid errors.

TERMS are cash in every case, although we will ship C. O. D. when 25 per cent of the amount is sent with order.

REMITTANCES should be made by Bank Draft or Postal or Express Money Order, but we will accept personal checks where it is impossible for you to secure Postal, Express or Bank Drafts.

SELECTION OF VARIETIES. We can sometimes help in the selection of varieties, and a great many customers prefer to leave the selection with us. We will be glad to give you benefit of our experience and judgment in making up the assortment.

SUBSTITUTION. Please state on the order, in the proper space, whether or not we shall substitute in case we are out of any of the varieties wanted, otherwise orders will be shipped short.

SHIPMENT of nursery stock will travel better by express, and we recommend this plan wherever possible. However, we hope that all of our customers will state how they prefer shipments to move, whether by freight, express or parcel post.

CLAIMS will not be entertained unless made promptly on receipt of goods. We shall be glad to investigate any claim, provided it is made as soon as the stock is received.

GUARANTEE. We guarantee to deliver all trees and plants to the forwarding company in perfect condition, but do not guarantee that all the stock will live, as too much depends on the treatment the stock receives after it leaves our hands.

NON-WARRANTY. We give no warranty, expressed or implied, as to the description, quality, productiveness or any other matter of any trees, plants or bulbs we send out, and will not be in any way responsible for the crop. We do agree, however, to replace free of charge or refund the purchase price of any trees or plants that prove untrue to name, but we will not be responsible for a larger amount, and all sales are made with this understanding.

Suitable Distances for Planting

Apples, standard	30 to 40 feet
Pears, standard	20 to 30 feet
Peaches and Apricots	16 to 20 feet
Cherries, sweet	18 to 20 feet
Cherries, sour	18 to 20 feet
Plums	16 to 20 feet
Grapes (bunch)	8 to 10 feet
Grapes (muscadine)	10 to 25 feet
Figs	15 to 18 feet
Currants	3 to 4 feet
Gooseberries	3 to 4 feet
Raspberries	3 to 4 feet
Blackberries	5 to 7 feet
Strawberries	3½ by 1½ feet
Pecans	60 by 60 feet

Apples

No fruit trees that can be planted will yield larger returns in health and general satisfaction than apples. Apples thrive and do well in almost any location, but prefer a rich, loamy soil. To secure best results the trees should be planted in the fall and early winter. November or December are the best months. We recommend that the trees be planted thirty feet apart each way, and for the first year or two protected from rabbits.

	Each	100
4-5 feet	\$0.50	\$40.00
3-4 feet35	30.00

EARLY HARVEST. May and June. Medium size; pale yellow; slightly acid; good quality. Ripens at a season when no other apple is in. Should be in every orchard.

YELLOW TRANSPARENT. One of the best early market apples, of medium size, skin yellow, flesh crisp and sub-acid; almost immune to blight.

RED JUNE. Early. Medium size; dark red; white flesh; juicy; sub-acid; ripens over a long period; bears well and is a very heavy cropper.

Delicious Apple.

YELLOW HORSE. Late summer. Large size; yellow; slightly red where exposed to sunshine. One of the best cooking apples and fills in between seasons better than almost any other. Highly satisfactory all over the South.

GRIMES GOLDEN. Early winter. Large; golden yellow; of high quality. Tree vigorous; a heavy bearer.

JONATHAN. Early winter. Medium size; dark red; excellent quality; tender, juicy and of rich flavor; early bearer and vigorous grower.

DELICIOUS. Late fall. Almost too well known to need description here. Fruit large, dark red; fine-grained flesh, crisp and juicy and of high quality. A splendid shipper and prolific bearer.

ROME BEAUTY. Winter. Large and handsome; yellow with creamy cheek. Almost covered with bright red where exposed. Its large size and beautiful appearance render it a valuable market sort. Vigorous grower and a heavy young bearer.

STAYMAN'S WINESAP. Winter. Larger and more prolific than the old Winesap. Rich, dark red; firm; fine-grained and juicy; adapted to a wide range of soils and climates.

WINESAP. Winter. Medium size; dark red; good quality; keeps well. Tree is a hardy grower and good bearer. A popular variety and well liked everywhere.

YATES. Winter. Small; yellow with dark red stripes. Not, strictly speaking, a commercial apple, but because of its sure and heavy crops has proven one of the most desirable southern sorts.

Grimes Golden Apple.

Staymans's Winesap Apple.

Pears

In selecting our list of varieties of pears, we have been careful to list only those that are suitable and desirable for our section. The entire list would prove satisfactory for home orchards, but for commercial orchard planting Kieffer will give the greatest returns. Pear trees seem to do best on rather high, well-drained land and should never be heavily fertilized, as excessive cultivation, moisture or fertilization is apt to induce blight.

	Each	100
4-5 feet	\$0.75	\$60.00
3-4 feet60	45.00

KOONCE. Very early. Tree a vigorous grower; comparatively free from blight. Fruit medium to large; skin yellow; flesh highly flavored.

BARTLETT. Probably the most popular of all pears; large; juicy; yellow; sweet and of high value for marketing or canning purposes; bears early and abundantly.

DUCHESS. Very large; fine quality; keeps well into the winter. Tree a strong, vigorous grower.

BUERRE D'ANJOU. A large, greenish pear shaded with crimson; highly flavored; rich; vinous and of excellent quality. Tree a vigorous grower and a good bearer.

FLEMISH BEAUTY. A large, beautiful, melting, sweet pear. Tree vigorous and succeeds well in most parts of the country.

LE CONTE. Large, with a smooth, yellow skin; flesh white, firm and juicy. Tree is free bearer and vigorous in growth.

GARBER. Resembles Kieffer in size, appearance and quality. Will succeed almost anywhere; is excellent for canning and preserving and recommended as a pollenizer for the Kieffer.

KIEFFER. A money-maker on account of its remarkably vigorous growth and early productiveness, its extraordinary size, splendid keeping and shipping quality and its excellence for canning and preserving.

SECKEL. Fruit medium in size, russet-brown and of very sweet flavor. Probably the finest flavored of all pears. Particularly valuable for the home orchard.

Kieffer Pears.

Belle of Georgia Peaches.

Peaches

There is hardly a ridge in the whole South on which peaches could not be successfully grown. Our list of varieties was selected with the idea of furnishing fruit throughout the season, and an orchard planted with these varieties will give fruit from early May until late September. The list is arranged in the order of ripening. Peach trees should be planted twenty feet apart each way, and as far as possible on high, well-drained land with a northern exposure.

Prices: 4-5 feet, 50c each; \$40.00 per 100. 3-4 feet, 40c each; \$30.00 per 100.

EARLY ROSE (Cling). One of the most valuable of the recent introductions; ripens with the earliest; is an extremely free bearer and comes into bearing young. The fruit is roundish, medium to large size and ripens ninety per cent red; is a good keeper and carries well. Last year and again this year this was the only early variety that showed a profit.

ARP BEAUTY (Free). Medium size; yellow, mottled with bright crimson; flesh is of rich yellow color and is really of very good quality for an early peach. Tree is hardy and very prolific.

GREENSBORO (Semi-cling). Large; oblong; white with red blush. Not recommended for commercial orchards, but should be in every home orchard.

CHAMPION (Free). Large; white, lightly blushed; almost round; of good flavor; extremely hardy but not a good shipper. Should be in the home orchard and grown for local market.

CARMAN (Free). Large; creamy white with deep blush; fine flavor; hardy in production; a good shipper; strong grower and early bearer.

HILEY (Early Belle). One of the best early shippers; large; white with bright red cheek. Has proven one of the most profitable sorts for commercial orchards.

BELLE OF GEORGIA (Free). Very large; white with red cheek; firm and excellent flavor; uniformly large and a very prolific and sure bearer.

EARLY ELBERTA (Free). Very large. Flesh yellow, firm, juicy and of fine flavor. Ripens just ahead of Elberta.

ELBERTA (Free). A standard by which all other varieties are judged; very large; yellow with red cheek; flesh yellow; firm; juicy and of high quality; hardy; sure bearer and excellent shipper.

ST. JOHN (Free). A large, brilliant, showy, yellow peach of good flavor and high quality.

J. H. HALE (Free). Larger than Elberta; ripens several days earlier and is superior to Elberta in flavor; a beautiful golden yellow with deep carmine blush. Has proven to be one of the best money-makers of recent introduction.

OLD MIXON CLING (Cling). Skin yellow with red cheek; flesh pale white; very juicy, rich and highly flavored; one of the best of white clings.

CHINESE CLING (Cling). Large; white with red cheek; excellent quality; exceedingly juicy. A very popular peach, although not recommended for commercial orchards.

HEATH CLING (White Heath). (Cling). Skin and flesh white, tinged with red, tender, juicy and of high flavor. A wonderful peach for canning and pickling.

WONDERFUL (Free). Large; yellow overspread with carmine; highly flavored and very firm.

KRUMMEL'S OCTOBER (Free). Deep yellow with carmine blush; very late; a splendid shipper and keeps well.

Early Elberta.

-------------------------	---------------------	-------	-------

Plums

We list only the very best varieties, all of which we know will prove entirely satisfactory for planting in the South, and wish to call particular attention to Compass Cherry-Plum, which is unequalled for preserving purposes. No home orchard should be planted without including a few plum trees. The plum requires about the same treatment as that given the peach or apricot, and prefers a high, well-drained soil.

Prices:	Each	100
4-5 feet	\$0.75	\$60.00
3-4 feet60	45.00

ABUNDANCE (Botan). Medium to large; color, bright red overlaying a yellow ground; cling. Tree strong, thrifty and upright grower and an early and prolific bearer. One of the best.

BURBANK. Large; mottled red and yellow; good quality; cling. Tree a strong, straggling grower and immense bearer.

RED JUNE (Red Nagate). Medium to large; deep red; handsome bloom; very showy; quality good; good shipper and ripens a week earlier than Abundance. Tree a vigorous, upright grower; late bloomer; sure and heavy bearer.

WICKSON. Probably the most beautiful tree of all plums; color deep red; flesh firm, yellow and of very good quality. The principal objection to this variety is the fact that it is inclined to be a rather shy bearer.

WILD GOOSE. One of the best known of all the plums; large; deep red when ripe; good quality; very juicy. One of the best native varieties, ripening earlier than the Japanese sorts.

Red June Plums.

SHROPSHIRE DAMSON. Medium; dark purple flesh; grown largely for preserving purposes. Probably the best preserving plum.

COMPASS CHERRY-PLUM. A cross between the Sand Cherry and the Plum; fruit about as large as the ordinary cherry; very bright red; acid. Valuable because of its sure, heavy cropping qualities; used principally for preserving; absolutely hardy.

Large Montmorency Cherries.

Cherries

The sweet or dessert varieties are not recommended for commercial planting, but there should be a few trees in every planting. Sour or pie varieties are reasonably sure croppers when planted on fairly high land. We have grown all of the varieties listed in our own orchards for a good many years with great success. The trees should be planted twenty feet apart each way.

Prices:	Each	100
3-4 feet\$0.70	\$50.00

BLACK TARTARIAN (Sweet). Of large size; heart-shaped; purplish-black; flesh tender, juicy and of fine quality. Tree an erect, beautiful grower and heavy bearer.

GOVERNOR WOOD (Sweet). Light yellow; extremely sweet, juicy and of rich flavor. Tree vigorous and productive.

LARGE MONTMORENCY (Sour). One of the best flavored cherries in its class; larger and finer than Early Richmond and ripens ten days later. Tree of rapid growth and a heavy bearer.

EARLY RICHMOND (Sour). Extra early; bright red; very valuable for canning. Tree extremely hardy and productive.

ENGLISH MORELLO (Sour). Fruit large, dark red, almost black; tender; juicy, acid; rich and of good quality. Tree dwarf, slender and bears well.

Early Richmond Cherries.

Quinces

One of the most desirable of all the fruits for canning and preserving. The trees are thrifty, requiring but little care, grow in almost any soil and produce quantities of beautiful fruits. Plant twelve feet apart each way.

Price:	Each
3-4 feet	\$0.75

ORANGE. Very large; yellow; rich and of excellent flavor; one of the best.

MEECH PROLIFIC. A very vigorous grower and very productive; very large; orange yellow; of great beauty and delightful fragrance.

Orange Quince.

Apricots

Of course the apricot doesn't always bear due to late spring freezes which sometimes catch them in bloom, but every home orchard should have a few apricot trees. We are listing only the two most desirable varieties.

Price:	Each	100
4-5 feet	\$0.75	\$60.00

EARLY GOLDEN. Small; pale orange-yellow; juicy and sweet; highly flavored. Recommended for southern planting.

ROYAL. A standard variety; medium to large; pale yellow with orange cheek; very desirable and equally valuable for canning or drying.

ALABAMA. Sept. 18, 1922.—"I ordered 100 peach trees from you last year and you sent 102, and 102 of them are living yet. I am mighty well pleased with them. I also found them free from diseases."

MISSISSIPPI. Jan. 7, 1922.—"The trees have come. They are in excellent shape. Prof. A. B. McKay was here from the A. & M. College when they were opened up and he spoke very highly of the quality of your trees."

Lutie Grapes.

Raspberries

Raspberries should be planted in rows five feet apart and three feet apart in the row. Cultivation and method of handling is similar to that of the blackberries.

Prices	10	100
	\$0.75	\$6.00

ST. REGIS. Sometimes called "Everbearing." Usually produces a good crop in the spring and a second crop in the fall. Berries bright crimson, large and have strong raspberry flavor. Very prolific.

CUTHBERT. Fruit crimson, large, firm and very juicy. A strong, upright grower and perfectly hardy.

CARDINAL. Large reddish-purple fruit; very strong grower and will succeed where other varieties fail.

Cuthbert Raspberries.

Grapes

One of the easiest and perhaps the most satisfactory fruit crop that can be grown. Grape vines will grow almost anywhere and require but little cultivation, pruning in the winter to prevent an overcrop being about the only requirement for producing fruit. The vines can be trained to a trellis, fence, summer-house or even straight poles. Plant ten feet apart each way.

Prices of all Grapes	Each	100
	\$0.30	\$20.00

CONCORD. Fruit dark purple, nearly black, extra large and very sweet. One of the best known and most popular of all the grapes.

AGAWAM. Fruit large, red and of fine flavor. A good cropper and very prolific.

DELAWARE. Fruit red, rather small, juicy and sweet. We think the best table variety grown.

IVES. Fruit of medium size; black, sweet. An excellent wine variety. Vine a vigorous grower and very prolific.

DIAMOND. Fruit of a greenish-white color, very large, sweet and of good quality. Vine perfectly hardy and a good bearer.

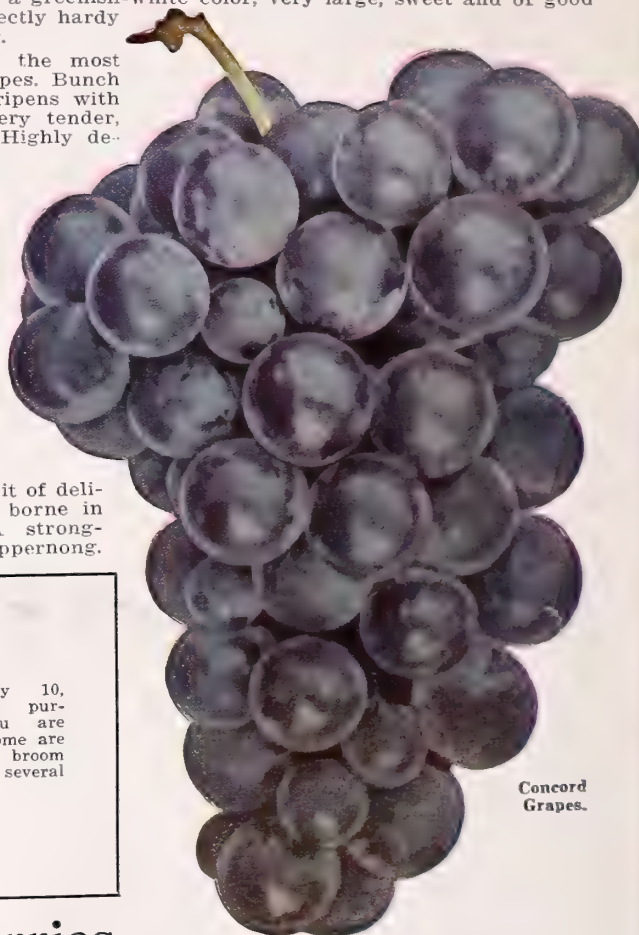

NIAGARA. One of the most valuable white grapes. Bunch and berry large; ripens with Concord. Fruit very tender, sweet and juicy. Highly desirable.

LUTIE. A true southern variety. Fruit large, brownish-red and of delicious flavor. A good, sure bearer.

Prices of all Scuppernong, 40c each; \$30.00 per 100.

SCUPPERNONG. Very large, bronze colored fruit; flesh very sweet; grown in clusters, not bunches.

JAMES. Large. Fruit of delicate flavor and is borne in large clusters. A strong-growing, black Scuppernong.

Concord Grapes.

GEORGIA. July 10, 1922.—"The trees purchased from you are growing nicely. Some are larger than a broom handle now with several months to grow."

Blackberries

Improved Blackberries are of greater size, sweeter, and of finer flavor than the wild sorts.

The growing of this very delicious and healthful fruit is attended with so little trouble and expense that every garden, however small, should have at least fifty plants. For cooking purposes they are unsurpassed, and will yield a dark wine of excellent quality.

Plant in rows six feet apart with the plants three feet apart in the row. Remove all old canes as soon as they have borne their crop, as they fruit but once. The young canes should be pinched when about three feet high, which will cause them to branch and increase the next year's crop.

Price	10	100
	\$0.75	\$6.00

EARLY HARVEST. Ripens ten days to two weeks earlier than any other blackberry; very productive and a good shipper. Fruit is of good size and excellent quality.

ELDORADO. Berries very large, reddish-black, very sweet and without hard core. Late.

Eldorado Blackberries.

Japanese Persimmon.

Mulberries

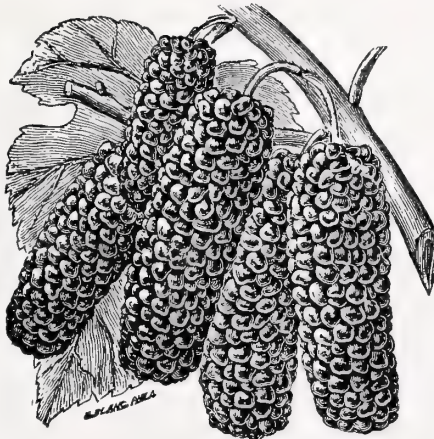

The varieties of mulberries we have listed are all strong, vigorous growers, and are entirely hardy. Mulberries are valuable for planting in hog pastures and chicken yards. Will grow in almost any soil and with very little cultivation. Trees should be planted twenty-five feet apart each way.

Price Each 100
\$0.75 \$60.00

DOWNING. Strong, upright grower; fruit large, black. A sure, heavy bearer.

NEW AMERICAN. Fruit large, black and of delicious flavor. Tree of rapid growth and with large, glossy leaves.

HICKS. Very heavy bearer; fruit ripens over a long period.

Downing Mulberries.

Nut Trees

Chestnuts

Price, \$1.00 each.

AMERICAN SWEET. A native tree too well known to need description. Nuts sweet and of delicate flavor.

JAPAN MAMMOTH. Of dwarf growth, not, strictly speaking, a tree; productive and bears extremely young. Nuts of immense size, of fair quality, but not so highly flavored as the native American.

Walnuts

Price, \$1.00 each.

ENGLISH WALNUT. Tree valuable for its shade as well as nuts, which are thin-shelled, full-meated and delightfully flavored.

JAPAN WALNUT. The tree is a strong, vigorous grower, bears well and is highly productive. Is valuable both as a nut and ornamental tree. Nuts rather thick-shelled and flavored somewhat like the Butternut.

Pecans

The pecan tree is not particularly choice as to its soil or location. It will thrive in any soil that will produce hickory; is comparatively free from insect pests and diseases; is of long life and requires but little attention after being once established. The land on which a pecan grove is planted may be used for growing other crops such as cotton, peas, etc., until the trees are large enough to begin bearing. They are also specially recommended for planting as shade trees around homes and barnyards, in fact wherever shade trees are desired.

Prices. Budded and Grafted Pecans: Each 10 100
2-3 feet \$1.00 \$ 9.00 \$ 80.00
3-4 feet 1.25 11.00 100.00

DELMAS. Large size; plump and well filled. The tree is a strong grower and productive.

FROTSCHER. Medium to large size; plump; rich meat. Tree very hardy and a strong grower.

SCHLEY. Thrifty, strong grower. Nut rather long, well filled and of high quality.

STUART. Probably the best known and most valuable of all the pecans. Extremely hardy and a strong grower. Nuts of good size, plump and well filled.

Japanese Persimmons

The Japanese Persimmons are a decided improvement over the native American variety. The trees are vigorous growers and bear heavily while quite young. The fruit is much larger and of better quality than that of the American Persimmon, but should be gathered just before frost and ripened in a cool, dark room. Plant fifteen feet apart.

Price: Each 100
3-4 feet \$0.75 \$60.00

COSTATA. Fruit medium size, conical and almost seedless. Skin yellow. Flesh light yellow.

HYAKUME. Fruit large, dark brown, very plump, sweet and meaty. One of the best varieties.

TRIUMPH. Fruit yellowish-red, smooth skin. Flesh yellow, fine grained and excellent quality. One of the best varieties.

TANE NASHI. One of the best known Japanese varieties. Fruit large, smooth, symmetrical and ripens early. Bears young and is productive

Celestial Fig.

Figs

In North Alabama figs should be planted in a somewhat sheltered location, against buildings, or on the south side of a natural windbreak; the latter would be best. Further south the plants may be set in the open, as the winters are not severe enough to injure the trees. Figs bear quite well and the fruiting season extends over a long period. Plant twelve feet apart each way.

Price: Each 100
3-4 feet \$0.75 \$60.00

BROWN TURKEY. Fruit medium to large, pear-shaped; coppery-brown skin, with white or yellow tinted flesh. Very productive.

CELESTIAL. Very hardy; vigorous grower. Fruit small but juicy and of excellent quality.

Branch of Pecan Tree.

Strawberries

There should be a planting of strawberries in every garden. Soil should be prepared thoroughly and to a good depth. After planting there should be a good mulch applied along each side of the rows. Clean straw or old leaves may be used for this mulching. We are offering what we consider the best varieties for this section which are listed in order of ripening.

Prices:

100, postpaid	\$1.00
500, postpaid	4.50
1000, by express	8.00

KLONDYKE. A large, bright red berry of uniform size and a good shipper. Plants grow vigorously and are quite healthy.

LADY THOMPSON. One of the most profitable of the strawberries for southern planting, combining large size and good shipping quality.

SENATOR DUNLAP. A heavy producer of high quality. Fruit firm and of fine flavor. Beautiful color.

AROMA. In our opinion the best of all the late varieties, being used largely as a commercial sort. Fruit of large size and dark red. Wonderful shipper.

Aroma Strawberry.

Asparagus

Asparagus occupies but little room and should be in every garden. We recommend that it be grown in rows rather than in beds. The rows should be opened ten to fifteen inches deep and filled in about four to six inches with well-rotted stable manure mixed with top soil, additional soil being added to bring the prepared bed to within two inches of the surface, then plant, being careful to firm the roots thoroughly. Cover about two inches deep. Do not cut any of the first season's growth. Allow the plants to seed themselves.

Prices:	25	100
Strong 2-year crowns	\$1.00	\$3.00

Asparagus.

Senator Dunlap
Strawberries.

CONOVER'S COLOSSAL. Grows to large size; stalk tender and of excellent flavor. In our opinion the best variety for planting.

COLUMBIAN MAMMOTH. A strong, vigorous grower, producing great quantities of clear white stalks.

Rhubarb

Rhubarb should always be planted in a shaded location, as the plant requires protection from the sun. Care should also be taken to provide proper drainage.

Prices: 25c each; \$2.00 per 10; \$12.00 per 100.

Strawberry Planting.

Deciduous Shrubs

Better effects can be secured from the planted shrubbery if a definite plan is decided upon before the order is made out.

Borders of shrubbery can be well used to separate neighboring properties or portions of farms or large estates. Then groups of trees and plants of assorted height and types of growth should be used in corners of grounds, the larger or taller ones in the background, leaving centers of grounds for lawn, flower beds, etc.

We have been very careful in selecting our lists of varieties of shrubs, offering only those that may be satisfactorily used in almost any planting. Nothing will add more to the appearance and value of a home than the proper planting of flowering shrubs. Practically all of the shrubs listed should be planted three feet apart each way.

Almond, Flowering - *Amygdalus*

A beautiful, early blooming, dwarf shrub of shapely, compact growth, especially valuable because of a profusion of flowers which come very early in the spring. We offer two varieties, white and pink, which are identical in habits of growth, the only difference being in the color of the flowers. Price, 75c each.

Buddleia—Butterfly Bush.

Calycanthus Florida - Sweet Shrub

One of the best known shrubs; of quick, bushy growth, bearing fragrant chocolate-colored flowers. Price, 50c each; \$4.00 per 10.

Crape Myrtle - *Lagerstroemia Indica*

Perhaps the best known and most desirable of the older shrubs. Grows to a large size. Flowers produced in profuse panicles, appearing in midsummer and continuing through until fall. We can furnish in four colors, pink, white, purple and red. Specify color wanted. Price, 75c each; \$6.00 per 10.

Deutzia

DWARF DEUTZIA (*Deutzia Gracilis*). A very dwarf, low-growing bush, never taller than 3 feet. Is covered very early in the spring with pure white, bell-shaped flowers. Highly desirable. Price, 50c each; \$4.00 per 10.

PRIDE OF ROCHESTER. A fine, large growing shrub. Flowers pink in the bud and turn to white when full grown; blooms early. Price, 35c each; \$3.00 per 10.

CRENATA. Double white; of strong growing habit, producing an abundance of pure white, double flowers in the early spring. Price, 35c each; \$3.00 per 10.

SPIREA VAN HOUTTEI

Althea - Hibiscus, Rose of Sharon

A tall, upright, hardy shrub of strong, vigorous growth and adapted to almost any soil; flowers in great profusion in midsummer and continues to flower until early fall. There are a number of valuable varieties both single and double. We list what we consider the best. Price for all varieties, 35c each; \$3.00 per 10.

ANEMONOEFLORA. Very large, double red.

BICOLOR HYBRIDA. Double; white with beautiful purple center.

COELESTIS. Single blue flower.

JEANNE D'ARC. Double; pure white. The best of the whites.

PULCHERRIMA. Double; white striped with pink.

RUBIS. Single bright red flowers.

TOTUS ALBUS. Single flower, pure white. Very beautiful.

VIOLET CLAIR. Almost double; violet.

Barberry - *Berberis*

THUNBERGII (Japanese Barberry). A splendid, hardy dwarf-growing shrub. Particularly desirable for massed planting against foundation walls or where a low-growing hedge is wanted. Dark green foliage through the summer, changing to various shades of crimson in the fall. In this latitude almost evergreen. In the fall the plants are almost covered with beautiful bright red berries which stay on nearly all the winter. Price, 35c each; \$3.00 per 10. (Also see hedge plants).

Butterfly Bush - Buddleia

While comparatively new, this shrub has attracted more attention than almost any shrub of recent introduction. Of graceful, drooping habit of growth. Blooms in midsummer and flowers are borne in great profusion at the tip of every piece of new growth. Color violet. Price, 50c each; \$4.00 per 10.

Deutzia, Pride of Rochester.

Dogwood - Cornus

A valuable class of shrubs, with handsome variegated foliage in some, ornamental bark in others, and all with showy heads of flowers, followed by ornamental fruits. All of easy culture in most soils.

WHITE-FLOWERING (Cornus Florida). Small growing tree covered in the early spring with a mass of large, pure white flowers. Price, 50c each; \$4.00 per 10.

RED-FLOWERING (Cornus Florida Rubra). Habit of growth and time of flowering almost identical with the white variety, but flowers are red or pink. Price, \$1.00 each; \$8.50 per 10.

RED-TWIGGED (Cornus Sibirica). Grown as a large shrub. Branches are of a deep crimson. Very beautiful during the winter. Price, 50c each; \$4.00 per 10.

Forsythia - Golden Bell

A very showy, early blooming shrub. Will thrive in almost any soil. Flowers are borne in great profusion in the early spring and are of a beautiful, rich, golden yellow. Price, 35c each; \$3.00 per 10.

Honeysuckle - Lonicera

FRAGRANT BUSH HONEYSUCKLE (Lonicera Fragrantissima). Vigorous, strong growing shrub. Blooms earliest of all shrubs in the spring. Flowers are creamy-white or light yellow. Very fragrant. Price, 50c each; \$4.00 per 10.

JAPANESE BUSH HONEYSUCKLE (Lonicera Morrowii). A highly decorative, vigorous growing shrub. Flowers of creamy-white in early spring, followed by red berries which stay on far into the fall or winter. Price, 50c each; \$4.00 per 10.

Hydrangea

No class of shrubs are better known than the Hydrangeas, as they include some of the most showy plants in cultivation. Transplant easily, have no diseases, and bloom when there is a scarcity of flowers.

HILLS OF SNOW (Arborescens Grandiflora Alba). A strong growing, perfectly hardy shrub producing great quantities of beautifully formed white flowers. Somewhat like the old-fashioned snowball. Price, 75c each; \$6.00 per 10.

LARGE-FLOWERING HYDRANGEA (Hydrangea Paniculata Grandiflora). An old time favorite. A strong grower and profuse bloomer. Flowers are white and borne in immense pyramidal panicles, beginning to bloom in July and continuing until frost. Price, 75c each; \$6.00 per 10.

Japan Quince - Cydonia Japonica

Strong growing, thorny shrub. Flowers a bright crimson. Price, 50c each; \$4.00 per 10.

Lilac - Syringa Vulgaris

No need to recall the many virtues of this favorite and charming old-fashioned shrub, since they are known to everyone. We are all familiar with the pretty cool green of their leaves and the delightful fragrance of their flower trusses. Suffice it to say they are perfectly hardy and will grow wherever they are planted.

PURPLE LILAC. A large free growing shrub. Beautiful, dark green foliage. Flowers a bluish-purple. Blooms in early spring. Price, 50c each; \$4.00 per 10.

COMMON WHITE LILAC. Same habit of growth as the purple. Flowers white. Price, 50c each; \$4.00 per 10.

Mock Orange - Philadelphus

Are mostly large shrubs, growing from 6 to 10 feet high. Of vigorous habit, very hardy, with large, handsome foliage and beautiful white flowers produced in great profusion. They merit a place in every collection of shrubbery.

CORONARIUS. Will be found highly desirable for growing with other shrubs. Of strong, vigorous growth. Blooms in early summer. Flowers of pure white borne in large clusters. Price, 35c each; \$3.00 per 10.

GORDON'S MOCK ORANGE (Philadelphus Gordonius). Blooms later than Coronarius. Flowers are pure white and borne in dense clusters. Price, 35c each; \$3.00 per 10.

Pearl Bush - Exochorda Grandiflora

A highly desirable, tall growing shrub. Large, pure white flowers almost covering the plant. Blooms in early spring. Price, 50c each; \$4.00 per 10.

PRIVET (See Hedge Plants, page 13.)

Snowball - Viburnum

A group of hardy shrubs with handsome, showy flowers, produced in large, globular clusters. All of the flowers are sterile and radiant, and appear in numerous, compact balls. An old time favorite, and without doubt one of the best of the flowering shrubs. As specimen plants the Snowball has few rivals, and for grouping and massing make possible many charming effects.

COMMON SNOWBALL (Viburnum Opulus Sterile). An old time favorite. Grows to a large size and produces an abundance of globe-shaped white flowers. Price, 50c each; \$4.00 per 10.

JAPANESE SNOWBALL (Viburnum Plicatum). An extremely handsome shrub with beautiful foliage and snowy-white flowers borne in large clusters. Price, 75c each; \$6.00 per 10.

Snowberry - Symphoricarpos Racemosus

A very showy shrub with slender branches. Small pink flowers followed by large, white berries which stay on well into the winter. Conspicuous in mass planting, but not desirable for a damp, poorly drained location. Price, 35c each; \$3.00 per 10.

Hydrangea arborescens sterilis—Hills of Snow.

Spirea

All the Spireas bloom extravagantly, which makes them decidedly striking. A good collection of them will give flowers the entire season. There is a great variety in their inflorescence, and in the habit of the shrub, so there can be no danger of monotony in such a collection. All the species are easily grown, and will be found useful for specimens, groups and borders.

DWARF WHITE SPIREA (*Callosa Alba*). Of compact, dwarf growth, with upright branches crowned with large flat clusters of white flowers borne through the summer. Price, 75c each; \$6.00 per 10.

CRIMSON SPIREA (*Spirea Anthony Waterer*). A dwarf, compact growing variety. Perfectly hardy and highly desirable for bordering purposes. Flowers are of a bright crimson, lasting throughout the summer. Price, 75c each; \$6.00 per 10.

BRIDAL WREATH (*Spirea Prunifolia*). A medium size shrub of graceful habit of growth. Beautiful green foliage. Flowers small, white, double and borne in clusters the entire length of the branches. Price, 50c each; \$4.00 per 10.

LACE-LEAVED (*Spirea Reevesiana*). We consider this variety the best of the strong-growing spirea for the South. Flowers are perfectly double, pure white and borne in great profusion. Price, 50c each; \$4.00 per 10.

SNOW GARLAND (*Spirea Thunbergii*). A beautiful, small-growing, dwarf shrub. Branches slender and somewhat drooping. Foliage narrow and of a yellowish-green. Flowers small, white. Blooms very early. Price, 75c each; \$6.00 per 10.

Weigela Rosea.

BRIDAL BOWER (*Spirea Van Houttei*). The strongest growing of all the Spireas. Perfectly hardy. Grows anywhere. In early spring the branches are covered with beautiful, pure white blooms. Highly desirable for specimen or mass planting. Price, 35c each; \$3.00 per 10.

Weigela

Beautiful shrubs that bloom in June and July. The flowers are produced in so great profusion as almost entirely to hide the foliage. They are very desirable for the border or for grouping, and also as specimen plants for the lawn.

CANDIDA. Very beautiful green foliage; white flowers; blooms in the early spring. Price, 50c each; \$4.00 per 10.

EVA RATHKE. Hardly as vigorous as some of the other varieties, but perhaps the most beautiful of all; flowers a deep carmine-red. Price, 75c each; \$6.00 per 10.

ROSEA. If you can have only one Weigela, by all means plant this variety, which is of vigorous growth. Flowers are a deep pink and borne in great abundance. Price, 50c each; \$4.00 per 10.

INDIANA. March 29c, 1922.—“Received shipment March 28th. Was in good shape. Fine stock. Thanks for promptness.”

MISSISSIPPI. Dec. 2, 1922.—“My shrubs came in good shape. Thanks for the nice rose bushes.”

Gordon's Mock Orange.

The Judicious Planting of Ornamentals Gives Distinction to the Grounds.

Coniferous Evergreens

Further North, Coniferous Evergreens are used largely as windbreaks. Here in the South their principal use is as a background for flowering shrubs and as specimen or individual plants on the lawn. In arranging and planting evergreens, care should be used in placing the tall, pyramidal varieties at the back with the lower, or more dwarf growing varieties in front. We are always glad to help with suggestions as to the best varieties for any particular purpose and to help with the arrangement of plantings.

Arbor-vitae

This group contains the more popular forms of lower-growing evergreens. Pyramidal or globe shapes may be had and are popular for foundations, groups, hedges, cemeteries, vases, window boxes, in fact for every purpose an evergreen is wanted.

BERKMAN'S GOLDEN (*Biota Aurea Nana*). Very compact, dwarf growing, golden arbor-vitae. Ideal for cemetery lots, window boxes and tubs. The best of all the dwarf growing arbor-vitae. Price, \$2.00 each.

CHINESE (*Biota Orientalis*). A tall growing, hardy pyramidal variety. Foliage a dark green. Holds its color through the winter. Price, \$1.50 each.

GLOBE (*Thuja Occidentalis Globosa*). A very dwarf, globe-shaped variety. Foliage is of a bright green. Well adapted for planting in tubs and porch boxes. Price, \$2.00 each.

Globe Arbor-Vitae.

PYRAMIDAL (*Thuja Occidentalis Pyramidalis*). A tall, decidedly pyramidal grower. Valuable where a columnar arbor-vitae is wanted. Foliage bright green and holds its color well through the winter. Price, \$2.00 each.

SIBERIAN (*Thuja Occidentalis Warcana*). A dense, broad, regular pyramid with dark green foliage. Price, \$2.00 each.

Juniper - Juniperus

ENGLISH JUNIPER (*Juniperus Communis*). Of a dense, pyramidal growth with slightly drooping branches. Foliage grayish-green and very thick. Price, \$2.00 each.

IRISH JUNIPER (*Juniperus Hibernica*). Of rigid, upright growth, and extremely formal in character. Foliage deep green with bluish-green tinge. Price, 2-3 feet, \$1.25; 3-4 feet, \$1.50 each.

Abelia Grandiflora.

Spruce - Picea Excelsa

NORWAY SPRUCE. Of rapid growth, gracefully drooping in habit, regular in outline and perfectly hardy. Grows to a large tree. Price, \$1.50 each.

Pyramidal Arbor-Vitae.

Evergreen Shrubs

A most beautiful effect can be secured on small city lots by planting a continuous border of shrubbery along the sides of the house. Such kinds should be chosen as will not by their final height obstruct porches or windows. Evergreen, flowering and deciduous shrubs should be combined to present a compact appearance without crowding. Care should be used to select varieties whose tops will more or less grow together and which will present soft and pleasing lines at their tops and along the ground. Shrubs with colored foliage or flowers should be distributed among evergreens.

Listed in the collection of Evergreen Shrubs are some of the most beautiful of the plants we have in the South. All of these shrubs retain their foliage throughout the winter and are particularly valuable on this account.

Abelia Grandiflora

The most beautiful evergreen shrub we know. Of graceful, arching habit of growth. Brightly colored branches covered with dark, glossy green leaves which stay on through the winter. Flowers are white, tinged with pink and are borne in clusters from early spring until frost. Price, 75c each; \$6.00 per 10.

Euonymus

JAPONICA. A compact, upright growing evergreen shrub with bright, dark green foliage; stands trimming well and shows up beautifully as a specimen plant. Price, \$1.00 each; \$9.00 per 10.

SIEBOLDIANA. A highly desirable evergreen shrub of arching growth. Well suited for mass planting. In the fall almost covered with red seed suspended from floral envelope. Price, 75c each; \$6.00 per 10.

Privet - Ligustrum

JAPANESE (*Ligustrum Japonica*). A compact shrub of rapid growth. Large dark green foliage. White flowers in spring, followed by clusters of blue-black berries. Stands trimming well. Price, 50c each; \$4.00 per 10.

NEPAL (*Ligustrum Nepalense*). A graceful spreading evergreen shrub with thick, silvery, dark green foliage. White flowers, followed by clusters of blue-black berries. Valuable for banking against walls or makes a fine specimen plant. Price, \$2.00 each; \$17.50 per 10.

Climbing Vines

Vines have a place all of their own which cannot be filled by anything else. Oftentimes the judicious use of a few vines will transform an unsightly wall, outbuilding or old stump into the most beautiful spot on the place. They are also valuable for porch screens and pergola work.

Boston Ivy - *Ampelopsis Veitchii*

One of the finest hardy climbers for covering walls. Clings closely to the smoothest surface, covering with overlapping foliage. Color is a fresh, deep green, changing to the brightest shades of crimson and yellow in autumn. Price, 40c each; \$3.00 per 10.

Virginia Creeper - *Ampelopsis Quinquefolia*

Large, deeply cut leaves which turn to a beautiful crimson in the fall. Fine for covering trees, walls, rocky surfaces, etc. Price, 40c each; \$3.00 per 10.

Clematis

PANICULATA (Sweet-Scented Clematis). Flowers are of medium size, fragrant, pure white, borne in immense sheets in the late summer. Price, 40c each; \$3.00 per 10.

HENRYI. A large-flowering variety. Creamy white flowers and vigorous grower. Price, 75c each; \$6.00 per 10.

JACKMANNII. Flowers very large, velvety, violet-purple. Price, 75c each; \$6.00 per 10.

MADAME EDOUARD ANDRE. Large flowers of crimson red. The best of its class. Price, 75c each; \$6.00 per 10.

Kudzu Vine

Large foliage which makes a dense shade. Makes tremendous growth in one season. Not recommended for porch planting but for covering unsightly walls or outhouses. Price, 35c each; \$3.00 per 10.

Honeysuckle

HALL'S (*Lonicera Halleana*). Vigorous in this latitude. Flowers white, changing to yellow. Very vigorous, strong grower. Price, 40c each; \$3.00 per 10.

Boston Ivy.

SCARLET TRUMPET (*Lonicera Sempervirens*). The most beautiful and brilliant of all the Honeysuckles. The foliage is bluish-green. Flowers brilliant scarlet followed by scarlet berries. Price, 40c each; \$3.00 per 10.

YELLOW TRUMPET (*Lonicera Sempervirens Flava*). A beautiful strong growing vine. Bright green leaves. Flowers trumpet shape and of deep yellow. Price, 40c each; \$3.00 per 10.

Wistaria

Grand free-flowering vines with handsome, showy flowers. They are among the best and hardiest of ornamental vines and are well adapted for training on porches, arbors, etc. For best development, a deep, rich soil should be provided by trenching and enriching, for they amply repay for any favors of this kind. When well established a greater profusion of blossoms may be secured by rather severe pruning, cutting back the lateral shoots to short spurs.

PURPLE (*Sinensis*). Light purple and blue flowers in the early spring. Vine of a strong, hardy habit of growth. Price, 75c each; \$6.00 per 10.

WHITE (*Sinensis Alba*). Flowers almost pure white. Vine of strong growth and extremely hardy. Price, 75c each; \$6.00 per 10.

Clematis Paniculata.

Hedge Plants

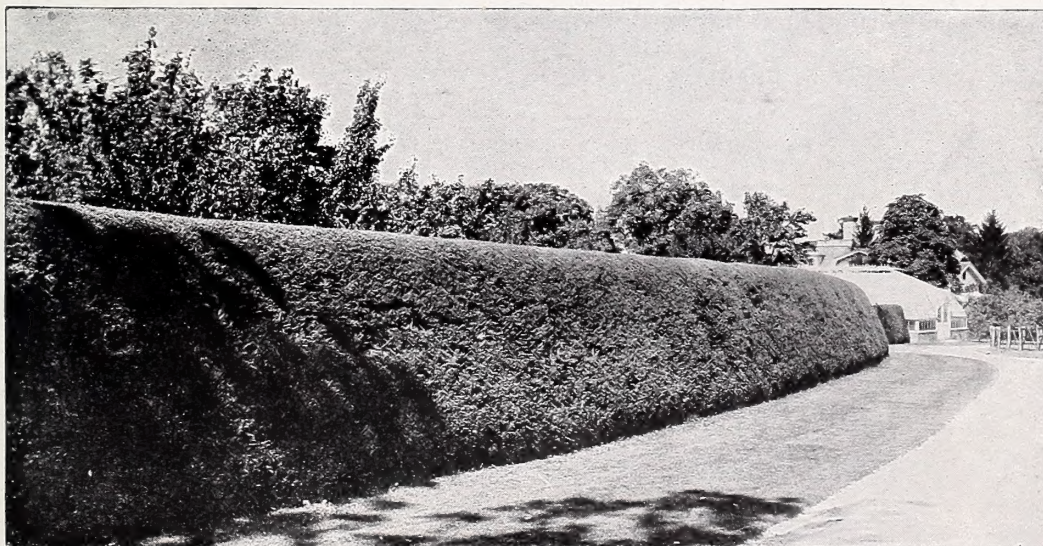

A living fence—one made of plants, attractive with their green leaves, formally trained or arched branches, colored foliage or bright berries is surely more pleasing than the still, rigid, mechanical effect obtained by the similar use of wood or metal. A lawn hedge is permanent—once planted, only occasional pruning or shearing is required. It is better practice in pruning to round rather than to shear perfectly flat on top, as this gives the bottom and side branches an opportunity to reach the sunlight and air necessary for full development of the hedge at its base and near the ground line.

We are listing only three varieties of hedge plants which will cover almost any ordinary need. For hedge planting purposes we recommend the Amoor River Privet as being the most desirable. The California Privet is also good, but slightly more formal in its habit of growth, while the Barberry should not be used where thorns are objectionable.

AMOR RIVER PRIVET (*Ligustrum Sinensis*). The most desirable of all the Privet family. In this latitude almost, if not quite, evergreen. It makes a large shrub with upright branches. Leaves dark green and lustrous; flowers are white, growing in erect panicles. If properly cared for will make a close, dense hedge. Price, \$7.00 per 100.

CALIFORNIA PRIVET (*Ligustrum Ovalifolium*). Of upright growth. Popular for hedges in the North and East. Not as desirable in the South as the Amoor River Privet. Leaves are dark green and very glossy, but sheds in midwinter. Price, \$5.00 per 100.

BARBERRY (*Berberis Thunbergii*). Full description of this plant will be found on page 9. Valuable where a hedge of low-growing character is wanted. Highly desirable in the North but not generally recommended for planting in the South. Price, \$20.00 per 100.

Amoor River Privet Hedge.

Red Radiance.

Roses

Roses have long been one of our hobbies, and we are offering the same list of varieties we have in our own gardens, all of which have been well tried and found worthy. Your rose garden should be located where the plants will have plenty of sunlight. To obtain the best results with roses, plant them early, in an open, airy situation. A clay or sandy soil with plenty of well-rotted manure worked into the soil is best. Roses well repay good treatment. Feeble, sod-bound plants cannot give free bloom, and frequent cultivation should be given. Old and decayed branches should be cut out, and cut back every shoot to about four to six inches above the crown, or above the roots where the stems begin to branch. A little cutting back after the first blooming will insure more late flowers. Protect in winter by covering at least six inches with leaves or coarse manure, a binding surface of dirt, corn stalks or boughs on top. Careful pruning, plenty of fertilizer and work will pay big dividends in the quantity and quality of the flowers.

Prices of all Everblooming Roses, 60c each; \$5.00 per 10.

White Roses

BESSIE BROWN. Of a distinct type in shape and color. Marvelously beautiful. Erect stems, full deep bloom with enormous petals. White, flushed with pink, growing deeper toward center.

SNOW QUEEN (Frau Karl Druschki). Hardy everywhere. A vigorous grower with bright green leaves; long buds; magnificent snow-white flowers with large saucer-shaped petals. Rightly named, and is one of the best white roses.

KAISERIN AUGUSTA VICTORIA. Pure white without a trace of pink. Splendid large buds and superb, full, double blooms. A steady grower and steady bloomer.

WHITE MAMAN COCHET. Very large and beautifully formed in bud and bloom. Pure waxy-white, taking a faint pink flush out-of-doors. Vigorous and blooms abundantly.

Pink Roses

PINK MAMAN COCHET. Rich rosy-pink, shading to silvery-rose on outer petal; exquisite in color and delightfully fragrant. Unquestionably the best of the Pink Tea Roses.

RADIANCE. Brilliant rosy-carmine shaded with rich opaline-pink tints in the open flower, which is large, full, of fine form with cupped petals; a constant bloomer and is highly satisfactory.

PAUL NEYRON. The largest of all roses. Blooms of bright, shining pink, beautiful, very double, full and finely scented. Blooms freely throughout the season. Stems almost thornless.

Yellow Roses

ALEXANDER HILL GRAY. Deep lemon-yellow, large, full flowers with high, pointed center, of perfect form, freely produced and strongly perfumed. One of the very best yellow roses offered.

ETOILE DE LYON. Golden yellow. A healthy, vigorous grower, blooming freely early and late. Full, deep, rich flowers. Very sweet.

Frau Karl Druschki.

Red Roses

GRUSS AN TEPLITZ. Perfectly hardy and very valuable for bedding or mass planting. Flowers vivid, dazzling, fiery crimson, sweetly fragrant and produced in great quantities.

RED RADIANCE. Clear red without a trace of other color; is a remarkable bloomer, being constantly in flower from early spring until freezing weather. A strong, vigorous grower and perfectly hardy.

GENERAL JACQUEMINOT. Still holds its place as the premier of red roses. Perfectly hardy and a strong, vigorous grower; large, shapely buds and handsome blooms of a bright, shining crimson. Very rich, brilliant, velvety and fragrant.

Moss Roses

CRESTED MOSS. Deep pink buds surrounded by mossy fringe and crest. Very fragrant. Strong grower.

RED MOSS. Light color. Large, full flowers and a very vigorous grower.

WHITE MOSS. Rosy-pink flowers. Very large, full and fragrant. Good fall bloomer.

Radiance

Hedge of Roses.

Climbing Roses

Prices of all Climbing Roses, 50c each; \$4.00 per 10.

CLIMBING AMERICAN BEAUTY. Flowers of large size, good form, of rich, red color passing to crimson. Very fragrant. Good foliage and absolutely hardy.

DOROTHY PERKINS. Beautiful shell-pink, which holds for a long time, shading to a lovely deep rose. Very sweetly scented, hardy and a strong grower.

EXCELSA or RED DOROTHY PERKINS. Intense crimson-scarlet. Double flowers in brilliant clusters set in glossy green foliage. Extremely vigorous and one of the handsomest of all climbers.

FLOWER OF FAIRFIELD (Everblooming Crimson Rambler). Brilliant crimson. Flowers almost continually in brilliant clusters from early summer until frost.

CRIMSON RAMBLER. One of the most popular of the climbers. A rapid grower and perfectly hardy; flowers in rich clusters of vivid crimson.

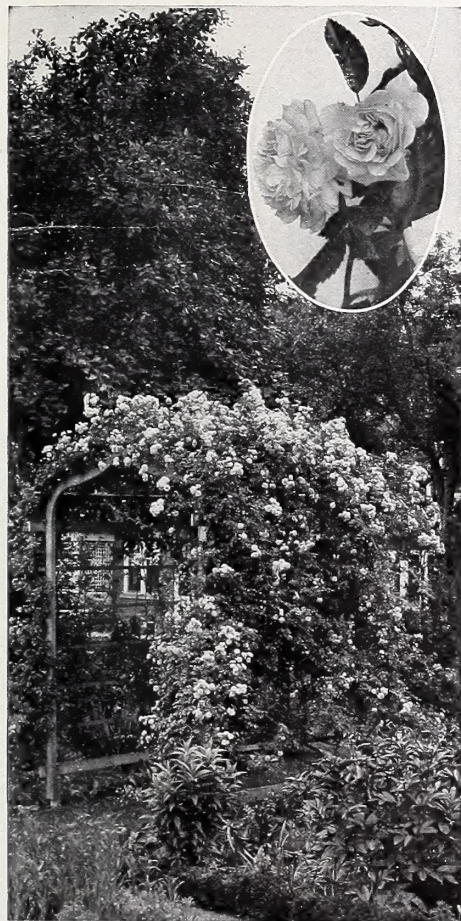

TAUSENDSCHOEN (Thousand Beauties). Varying in shade from a delicately flushed white to a deep pink or reddish-crimson; in bright clusters, almost covering the handsome green foliage.

WHITE DOROTHY PERKINS. A pure white sport from Dorothy Perkins, with which it is identical in variety and habits. A valuable addition to the hardy climbing class.

Shade Trees

Here in the South ample shade is essential, and any home lacking proper shade trees is deficient in one of the main requisites of an ideal Southern home.

Each of the shade trees we describe below has a special use. Care should be used in selecting the proper variety for each particular purpose.

Climbing American Beauty.

ASH, American White (*Fraxinus Americana*). A

handsome tree of thick growth desirable for both lawn and street planting. Dark green foliage, changing in the fall to yellow and purple. Price, 8 to 10 feet, \$1.00 each; 10 to 12 feet, \$1.50 each.

ELM, American White (*Ulmus Americana*). One of our best known and most appreciated native trees. It is of rapid growth and beautiful appearance. Leaves of moderate size and the tree is ideal for permanent shade. Price, 8 to 10 feet, \$1.50 each; 10 to 12 feet, \$2.00 each.

MAGNOLIA Grandiflora (Southern Evergreen Magnolia). A beautiful pyramidal evergreen tree with large, pure white flowers. Foliage dark green. Tree large, handsome and vigorous. Not hardy in the North. Price, 4 to 5 feet, \$2.00 each; 5 to 6 feet, \$2.50 each.

MAPLE, Ash Leaf - Box Elder (*Acer Negundo*). A very quick growing, soft-wooded tree with pale green leaves and bright green twigs. Not recommended for permanent shade. Price, 8 to 10 feet, 75c each; 10 to 12 feet, \$1.00 each.

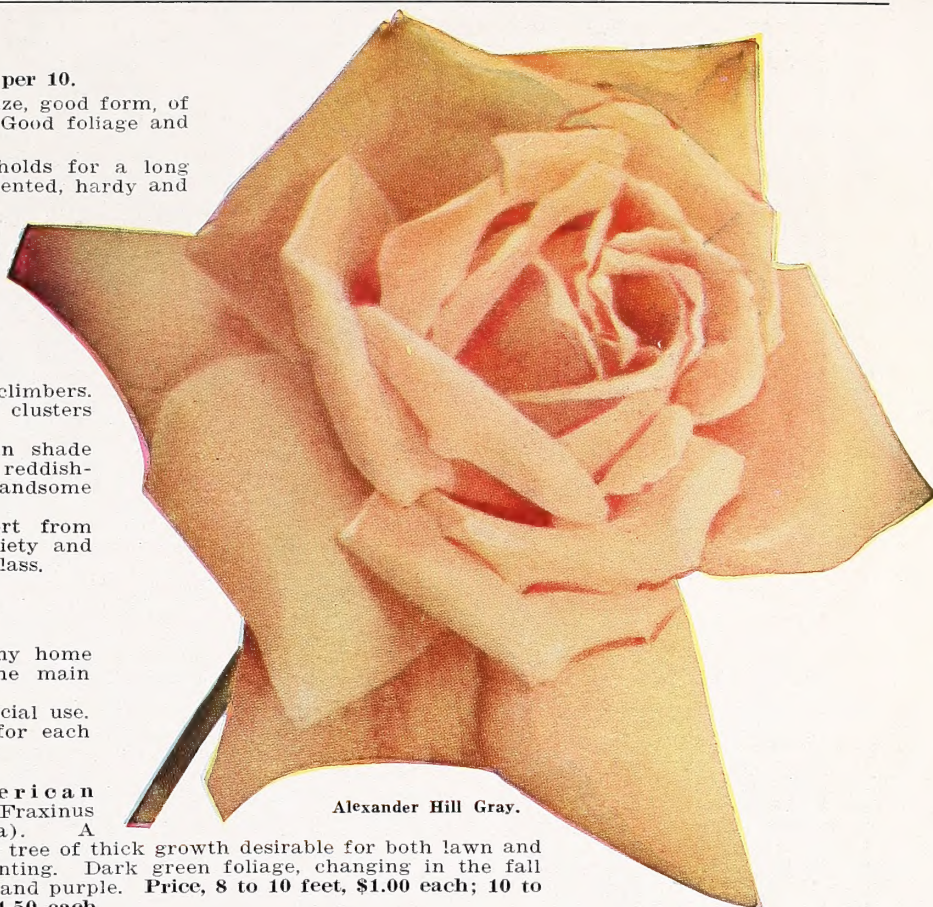

MAPLE, Silver (*Acer Dasycarpum*). An extremely hardy, rapid growing tree of large size. Very valuable for producing a quick shade. Fine for street planting. Price, 8 to 10 feet, \$1.00 each; 10 to 12 feet, \$1.50 each.

MAPLE, Sugar (*Acer Saccharum*). A well known and popular variety, somewhat pyramidal in its habit of growth. Foliage of a beautiful green through the summer, changing to all shades of gold, scarlet and crimson in fall. Not quite as quick in growth as Silver Maple, but highly desirable. Price, 8 to 10 feet, \$1.50 each; 10 to 12 feet, \$2.00 each.

POPLAR, Carolina (*Populus Deltoides Monilifera*). Not recommended where permanent shade is desired. Pyramidal in form with large, glossy leaves. Price, 8 to 10 feet, 60c each; 10 to 12 feet, 75c each.

POPLAR, Lombardy (*Populus Nigra Italica*). This tree grows to an immense height. May be used to good advantage for roadside planting or to break the monotony of low, round top trees. Also valuable as a screen or windbreak. Price, 8 to 10 feet, 75c each; 10 to 12 feet, \$1.00 each.

RED BUD, Judas Tree (*Cercis Canadensis*). A native tree which flowers in early spring, branches being practically covered with reddish purple flowers. Foliage dark green throughout summer and fall. Price, 5 to 6 feet, \$1.00 each; 6 to 8 feet, \$1.50 each.

Alexander Hill Gray.

An Attractive Driveway Planting.

Silver Maple.

Large Montmorency Cherries.

Special Combination Offers

Combination Offer No. 1 contains ten fruit trees and two grape vines. Just right for the small home planting. All of the largest size:

1 Early Rose Peach\$0.50
1 Belle of Georgia Peach50
1 Elberta Peach50
1 Krummel's October Peach50
1 Early Harvest Apple50
1 Delicious Apple50
1 Winesap Apple50
1 Kieffer Pear75
1 Red June Plum75
1 Large Montmorency Cherry75
1 Concord Grape30
1 Diamond Grape30

**Special Price
for the
Complete
Assortment
\$5.00**

Elberta Peach.

Catalogue Price \$6.35

Combination Offer No. 2 contains twelve fine flowering shrubs, enough to plant around a small house:

1 Althea\$0.35
1 Butterfly Bush50
1 Pink Crape Myrtle75
1 Deutzia, Pride of Rochester35
1 Golden Bell35
1 Hills of Snow Hydrangea75
1 Dwarf White Spirea75
1 Crimson Spirea75
1 Bridal Bower35
1 Weigela Rosea50
1 Fragrant Bush Honeysuckle50
1 Laced Leaved Spirea75

**Special Price
for the
Complete
Assortment
\$5.00**

Catalogue Price\$6.65

Combination Offer No. 3 contains six beautiful ever-blooming roses consisting of:

1 Snow Queen\$0.50
1 Radiance50
1 Alexander Hill Gray50
1 Red Radiance50
1 General Jacqueminot50
1 White Maman Cochet50

Catalogue Price \$3.00

**Special Price
for the
Complete
Assortment**

\$2.50

General Jacqueminot Rose.
